

IMA – Industry Solutions

M2M Portables

“Machine to Machine” Remote Cellular Access

M2M Portables

Connecting Technicians to Machines

Cellular VPN access through
Secure Cloud

M2M Portables

Why make these portable?

- Rugged, more suitable for industrial areas
- Ship on-site to save time and money for a field service call
- Separate from plant network
- Enable VPN only when needed

M2M Portables

Simple but Effective

- Stronger design than commercial VPN devices
- Simple VPN Enable switch
- Ethernet Access ports
- Power cord included

****NOTE** SIM CARD NOT INCLUDED**

M2M Portables

Different Options Available

1107518 M2M TC CLOUD ATT
1107519 M2M TC CLOUD VZW

2404252 M2M RS2000 ATT
1102358 M2M RS2000 VZW

2404230 M2M RS4000 ATT
1102357 M2M RS4000 VZW

Comparing the Different Options

Options available	Cost Effective	 Remote Access	Point-to-point VPN	Nat routing	SMS Alerts and Control	Network Security	Redundancy & additional features
TC Cloud Client 4G LTE 							
TC mGuard RS2000 4G LTE 							
TC mGuard RS4000 4G LTE 							

How to Position

- Great for smaller integrators that have limited field support

Cost Effective

- M2M TC Cloud option is great for quick maintenance changes
(only connects to mGuard Secure Cloud)

Basic Security

- M2M RS2000 option has more security features and can provide internet access on-site *(can connect to Secure Cloud or other cloud services)*

Premium Security

- M2M RS4000 option has the most security features with a WAN port which can provide a redundancy connection *(can connect to Secure Cloud or other cloud services)*

M2M Portables
