Power/mation®

# Industrial Internet Solutions

- Global Access
- Data Analytics
- Wireless
- Network Infrastructure
- Media

The Power/mation Advantage

Power/mation can help securely connect isolated islands of automation to each other, corporate systems and other service providers. Industrial data must be secure, available and transformed into information that empowers business leaders, operators and customers to improve all aspects of system performance.

With the right partners and technology, the real value of this information can be harnessed to improve quality, reduce downtime, manage assets and reduce costs.

The Modern Connected Plant

Global Access

The tools that provide secure communication to machines or systems over a network typically beyond the control of the user. Connecting remotely enables an OEM or data services provider to deliver support, monitoring, operating, data acquisition and analytics.

- SSL Appliances
- VPN Appliances
- Multi-User Access
- Cloud-Based Access

Data Analytics

Analytics transform data into actionable information for operators, managers and decision makers to further the potential of The Modern Connected Plant.

- Web-Enabled HMI
- Dashboard Solutions
- Cloud Storage
- Notifications

Wireless

Wireless technologies enable personnel and assets to connect over great distances, through harsh environments and in mobile applications, often with reduced cost and maintenance.

- 900 MHz Data and I/O
- Bluetooth® (802.15)
- WLAN (802.11)
- Accessories

Network Infrastructure

The hardware that enables efficient, robust and secure connectivity, communication, operations and management of a machine or system network.

- Routers
- Ethernet Switches
- Firewalls
- VPNs

Media

The materials that join production components and systems to one another and to higher levels through device - to - device communications.

- Cables
- Fiber
- Connectors
- Media Converters
- Surge Protection
- Accessories

The Industrial Internet connects people to machines and machines to machines. These connections offer different outcomes for OEMs and End Users. Learn how Power/mation can best leverage the Industrial Internet to work for you.

OEMs — Power/mation gives you the edge over competitors in technology, cost savings and revenue generation by offering seamless remote monitoring, global access and cloud-based solutions.

End User — Power/mation's Industrial Internet Solutions provide products and tools for network segmentation and cybersecurity for today's complex industrial control systems (ICS) and SCADA systems.
