Our Mission and a Global Cause

The COVID-19 pandemic has proven that industry must be ready to mobilize to combat unforeseen threats to the health of our population. The mission of Power/mation is to provide innovative automation solutions, and this extends to our support of the medical device and pharmaceutical industry.

Partnering with Power/mation

Power/mation has a technically-trained sales staff across our regions with knowledge to serve the medical device and pharmaceutical industry. Behind them is a dedicated team of technical specialists to guide your premarket application. Partnerships with over 100 of the industry's leading high-tech equipment suppliers allows Power/mation to provide the components you need.

Power/mation is conveniently headquartered in St. Paul, MN with offices in Pewaukee, WI and Wood Dale, IL to serve medical device businesses in the Twin Cities and Chicago metropolitan areas.

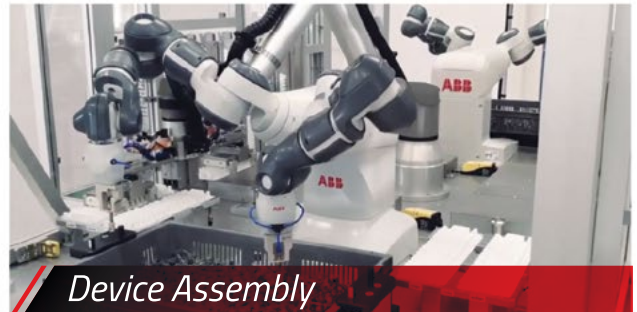

We support medical device manufacturers and medical automation through component selection, application design, and risk mitigation using trusted partners and suppliers. A key advantage to working with Power/mation is the Power/mation Solutions Group. A dedicated team of designers and engineers, Power/mation Solutions Group is your source for custom products and your partner in prototyping.

Key Applications

Explore the common industry applications in the life sciences segment and gain insight into enhancing your own projects with help from Power/mation.

Power/mation supplies you with the components you require for sensitive product applications requiring aseptic packaging.

Medical device assembly places high demands on precision, accuracy, and small size. Power/mation has experience collaborating with device manufacturers and a specialized product portfolio to meet these challenges.

Power/mation can assist in all aspects for general automation needs for filling and dispensing applications. This includes presence sensing, positioning, counting, and speed control with electrical components.

Quickly identify and address issues in your supply chain or product quality to minimize the impact to your process. Trace a product in real time as it moves through your facility.

The Power/mation Advantage

A growing portfolio of world-class automation suppliers gives Power/mation a unique advantage in creating truly tailored automation solutions that are not limited by a single product line. Our sales representatives are trained engineers ready to diagnose the needs of your application. A full technology support staff is there to monitor your application after the solution is commissioned.

Collaborative robots, piezo electric pneumatic valves, specialized dosing equipment, low vibration motors, and more. Power/mation provides the high-tech, industry-specific hardware that your application demands. See more at the [Power/mation Life Sciences website](#).

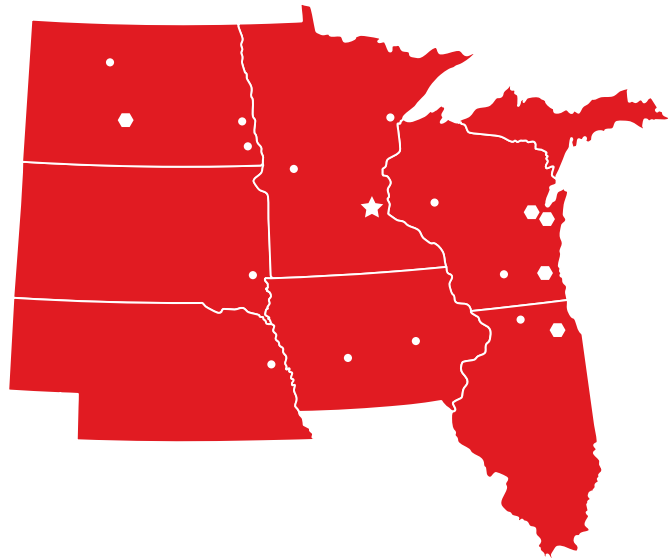

Power/mation recommends security to be your priority when implementing remote access. Information Technology (IT) attacks can lead to the loss of data and intellectual property being compromised. Operational Technology (OT) attacks can do harm to assets in the physical world. Power/mation offers strategies to defend against both attacks.

Power/mation has a highly-trained sales team to help select the appropriate technology and products that encompass all aspects of machine automation. As you develop your medical device application, Power/mation Solutions Group can assist you with the conceptualization of your assembly process.
