The Power/mation Advantage

Power/mation is dedicated to providing a complete range of machine safety products that meet and exceed our customers' machine safety requirements.

The Power/mation Solutions Group provides the most important piece to the Power/mation safety solutions offering—custom fencing. We are proud to produce these custom hard guard solutions in-house at our very own Pewaukee, Wisconsin facility.

Let our trained sales staff assess your needs and select the right components to completely safeguard your application. Power/mation has partnered with and strategically aligned with the industry's leading suppliers to offer a comprehensive source for all of your industrial machine safety needs.

Controllers, Relays, & I/O

Whether your application is compact and small or large and complex, Power/mation offers a comprehensive line of safety controllers. Partnering with the world's best suppliers allows for scalable solutions to meet the demands of modern safety applications.

Sensing & Lighting

Essential components of the functional safety system—light curtains, laser scanners, area lighting, signal lighting, pressure mats, radar, and more. Contact us to get started with safety.

Interlocks & Switches

Trap key, solenoid locking, RFID, magnetic, and fully customizable safety interlock solutions can be designed and scaled to meet your needs. A variety of limit switches and enabling devices are also available.

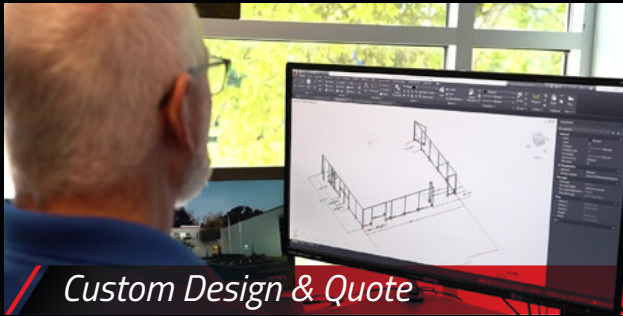

Radar-Based Safety

The first and only SIL2/PLd safety certified radar sensor system in the world. Technology that works where optics fail. Highly immune to dust, smoke, shavings, and other machining byproducts. Visit powermation.com/inxpect for details.

Custom Fencing

Power/mation has an in-house team to design, produce and ship custom-designed fencing solutions. Patented mounting hardware make installation easy and industrial grade materials like aluminum and high-impact polycarbonate make our Power/mation fencing among the most durable and attractive in the industry.

The Power/mation Solutions Group will customize a high-quality perimeter fencing system that meets your requirements. There are virtually no limitations to what we can build while still retaining a straightforward process of quotation, design, production, and delivery.

Custom Design & Quote

Our specialty is custom designed fencing systems. We translate your design files into a fencing file and send you the design in your choice of format. Big or small, we design all types of hard guard systems, operator terminals, or anything else you need for your application.

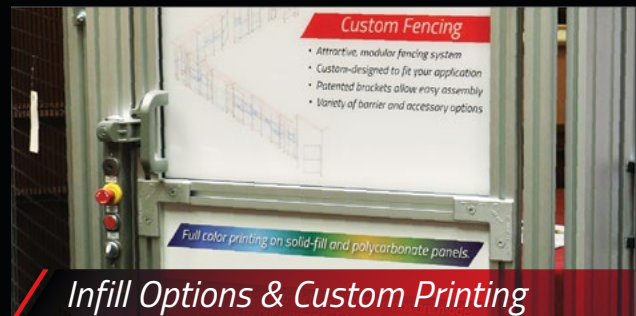

Easy Assembly

A patented T-Nut system allows you to assemble your system quickly with no special tools required for assembly. Get started with common hex keys and Torx bits. Replacement parts are readily available through Power/mation.

Custom Doors

Power/mation Solutions Group has developed multiple custom door styles for your unique application. Smooth-closing vertical and horizontal doors can greatly improve human experience with your fencing system. Removable panels can offer quick access for machinery repair.

Infill Options & Custom Printing

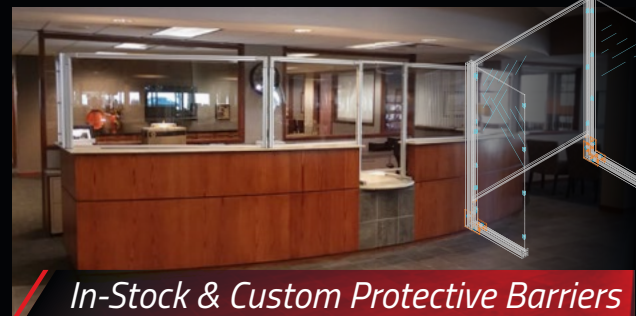

Full color printing on clear or solid infill panels available. Choose from the following infill options:

- Steel mesh
- Solid core ACM panel - full color paint available
- Clear polycarbonate
- Laser or weld arc-resistant polycarbonate

Secure Shipping

To say our shipping process is exacting is an understatement. Fencing components are arranged in the order you need them for assembly. Panels can be pre-assembled per your specifications. All items are wrapped and shipped securely on pallets.

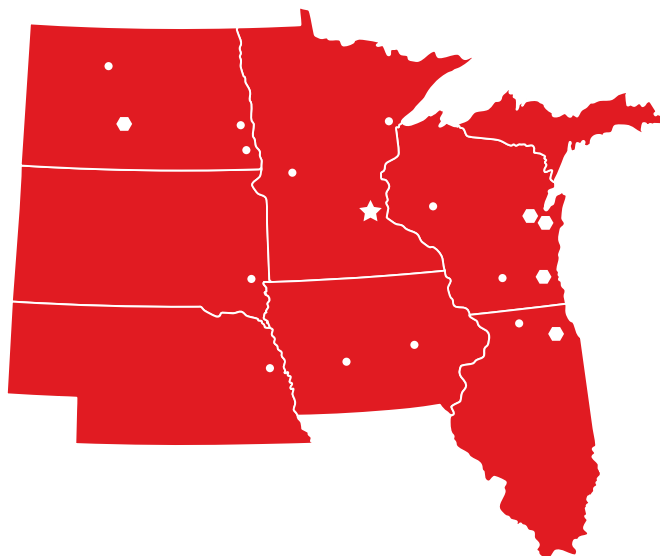

In-Stock & Custom Protective Barriers

Outfit your workplace or community with protective barriers to help prevent the spread of airborne pathogens. Power/mation offers in-stock styles with fully custom systems available.
