PTFIX goes functional

Introducing new functional and side-entry PTFIX families

PTFIX Function

Since its original release, PTFIX has been a family consisting of both distribution and feed-through terminal blocks. Multiple positions, mounting options, colors, and sizes are available. However, the PTFIX family has never had any function available beyond simple connections and distribution.

PTFIX Function is here to change that. Available in our standard -TG and -MT versions that are very popular in standard feed-through terminal blocks, PTFIX now disconnects, protects, and more. With the -MT and -MTL versions, disconnection of different branches of the distribution block is as simple as actuating the lever design of your choice. With the -TG pluggable zone, each branch of the PTFIX distribution block can handle a fuse, component holder, disconnect plug, or feed-through plug. All matching the same accessories within CLIPLINE complete!

Features and benefits

- 2.5 mm² outputs with larger 6 mm² feed-in terminal
- Variety of mounting options, just like standard PTFIX
- Disconnect levers available in both -MT screwdriver operation or -MTL finger operation
- -TG versions accept current CLIPLINE complete fuse plugs, component holders, disconnect plugs, and feed-through plugs
- 300 V, 45 A, 20-8 AWG per UL

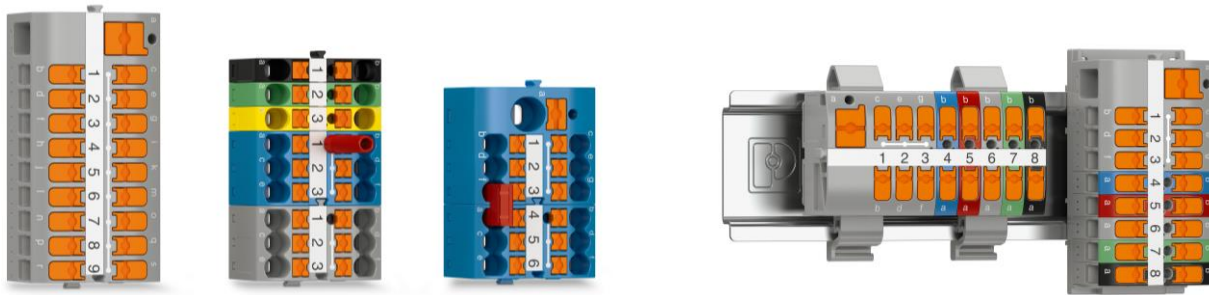

INDUSTRIAL COMPONENTS

Industrial Cabinet Connectivity

PTVFIX

If an application goes sideways, now you can choose PTVFIX with side-entry connection. The PTV family was recently introduced, allowing for the quick, simple, and reliable Push-in Connection to be paired with the standard side-entry of a screw combination, resulting in the best of both worlds. PTFIX has always been standard “top” or “front” entry, much like our standard PT terminal blocks. Just like PTV feed-through blocks, PTVFIX has the same function as PTFIX distribution blocks, but the wires will now enter in the side. This allows for cleaner and clearer wiring and negates the need for re-planning of the wiring and wire duct when crossing from screw-style terminal blocks.

PTVFIX is available with or without a feed-in connection in multiple colors, terminal point options, and mounting methods.

Features and benefits

- Five colors: gray, blue, red, green, and black
- DIN rail, adhesive, and direct mounting options
- 6, 12, or 18 terminal point options in 2.5 mm²
- Available with or without a larger 6 mm² feed-in contact
- 300 V, 20 A, 26-12 AWG (no feed-in), 300 V, 40 A, 20-8 AWG (feed-in) per UL
