TURCK

M12 Connectivity eurofast® Connectors, Receptacles & Cordsets

Patented Torque Sleeve Makes Installation Easier & More Secure

Safe and reliable communication between machines and systems is critical. To ensure industrial communication is not put at risk in tough environments, Turck has improved its M12 offering with a game-changing redesign.

A proprietary torque sleeve ensures installation is faster and more secure. Simply turn the built-in sleeve until you hear or feel it click into place. This family of solutions is also highly resistant to disconnection. All

product variants meet high IP and NEMA ratings.

M12 connectivity solutions are widely used in factory automation, including automotive and mobile equipment manufacturing. They are also ideal for applications where robots are used to help ensure reliable communication to a PLC or to the Cloud.

Talk to our experts about:

- Patented torque sleeve eases installation
- Resistant to accidental disconnection
- Meets IEC 60529 IP67, IP68, IP69 & NEMA 1, 2, 4, 6P, & 12 ratings & DIN 40050 IP69K
- Cost-competitive pricing, global offering
- Straight/right-angle, male/female, 3/4/5 pole configurations that are 18-24 awg and unshielded
